UC Browser APK has millions of downloads that are mostly in China, India, and Indonesia. While the internet browsing service is popular, the popularity is decreasing due to security concerns. The platform is a subsidiary of Alibaba Group that is developed by UCWeb. DuckDuckGo and Mozilla Firefox are safer alternatives to UC Browser, since you can turn tracking off in the alternative browser applications. UC Browser does not let you disable tracking. Firefox and DuckDuckGo are ad-free whereas UC Browser shows advertisements often. Google Chrome, Microsoft Edge, Opera, and Safari are additional internet browsers that are more trustworthy than UC Browser.How do I download UC Browser?The internet browser is cross-platform for Apple Mac, Linux, Microsoft Windows operating systems. While UC Browser is especially popular for Android devices, the browser is also available for iOS electronics like iPad and iPhone. UC Browser is often marketed as being a fast browser.UC Browser works like most browsing services. The search bar lets you type keywords in to find topics on the internet. Your recently searched websites will appear on the search page. A 'Top sites' category is available to let you easily open your favorite websites. The 'Most visited' area keeps track of the URLs that you go to the most. You can bookmark links to go back to.UC Browser delivers an incognito mode. While the incognito may hide your personal identity from sites that you visit, UC Browser still logs your

private information in the database.Is UC Browser safe?UC Browser is not safe, since the app automatically stores your software and hardware information. You will compromise end-to-end encryption for high speeds, but your IP address and network operator can get logged by UC Browser, your location will be automatically recorded into the system after you grant UC Browser permission, UC Browser sends your personal data to third-party advertisers like your device model, network provider, language, operating system version, IP ID, time zone, and GPS location.Even your Apple IDFA and Google AAd identifiers can be shared with third parties and your confidential information can get disclosed in investigations with UC Browser. While UC Browser does send info, the privacy policy states that your data will not be sold.How can I download YouTube videos from UC Browser?UC Browser includes a downloader like most web browsers, and you can download multimedia content directly from websites like YouTube. Your items will appear in the 'Downloads' area of the main menu. Videos that you download from the internet will appear in the 'History' and 'Downloads' areas. Your watching history is available in the 'History' tab. You can see a list of videos that you marked to 'Watch Later'. Other featuresThe main menu section can expand and collapse in the UC Browser app. Additional categories in the menu include bookmarks, history, themes, and tools. A night mode is available to customize your user experience.UC Browser features add-ons on the browser's home screen as a daily horoscope and weather forecast preview. The forecast will show the temperature and a brief description of the weather. Additionally, you can download online games from the game center, and is available in multiple languages like Chinese, English, Urdu, etc.Not the safest web browserUC web browser is not a reputable application to download, and not to mention, the app does not deliver a browsing experience that makes the service worth getting. You will have commands at the bottom of the simple interface with arrows to go forward and back. The hamburger menu will show you the main features. A home button is available to let you quickly navigate to the main screen.What's new?UC Browser is updated frequently and the versions vary with the device you use. While UC Browser has an ad-block feature, the platform is well-known for showing advertisements in the user interface.
